

Install Elevate Landing

Welcome to the **Elevate Landing Installation Guide!** ☐☐

Elevate Landing is a modern and responsive custom landing page designed to enhance the user experience on your **Wowonder** social network. With a sleek design, interactive elements, and optimized layout, this landing page is built to **attract new users, showcase recent activity, and boost engagement**.

This tutorial will guide you through the **step-by-step installation process**, ensuring that Elevate Landing integrates smoothly with your Wowonder site. Whether you're a developer or a site owner, **this installation is simple and requires minimal modifications**.

Install is simple, just replace the current

Upload merged_connect.php to the root folder

themes/wowonder/layout/welcome/content.phtml

or

themes/wondertag/layout/welcome/content-startup.phtml

Refresh your site and you are done

Now edit the page with your own content using a html editor
